

**CONSPECTUS OF DERMATOLOGY AND VENEREOLOGY
FOR STUDENTS OF DENTAL MEDICINE
(June 2018)**

GENERAL DERMATOLOGY (entrance test and oral exam)

1. Structure of the epidermis and basement membrane.
2. Structure of the dermis and subcutis.
3. Structure of the oral mucosa.
4. Skin appendages – hair, nails, sebaceous and sweat glands.
5. Skin blood and lymphatic vessels. Skin innervation.
6. Skin functions - keratinization, melanogenesis, sweat and sebum secretion.
7. Skin functions – viscoelasticity, thermoregulation, epidermal barrier, skin innervation and immune system.
8. Functions of oral mucosa.
9. Methods of investigation in dermatology.
10. Primary lesions – erythema, pigmentation, petechia, ecchymosis, telangiectasia, purport, papule, nodule, plaque, wheal, lichenification, vesicle, pustule, bulla.
11. Secondary lesions – erosion, excoriation, fissure, ulcer, scale, crust, atrophy, hypertrophy, scar.
12. Characteristics of oral lesions.
13. Histopathological changes in the epidermis, dermis and subcutis.
14. Topical treatment of skin diseases. Types of topical formulations (vehicles).
15. Topical treatment of skin diseases. Types topical agents by mode of action.
16. Systemic treatment of skin diseases.
17. Physical treatment of skin diseases.

SPECIAL DERMATOLOGY (SKIN DISEASES)

1. Streptococcal skin infections. Impetigo. Ecthyma.
2. Streptococcal skin infections. Erysipelas.
3. Staphylococcal infections of the hair follicles.
4. Staphylococcal infections of the sweat glands and glabrous skin.
5. Skin tuberculosis.
6. Lyme disease.
7. Pityriasis versicolor.
8. Tinea capitis, tinea barbae, tinea corporis.
9. Tinea manus, tinea pedis, tinea unguium.
10. Candidiasis.
11. Actinomycosis. Mycetoma.
12. Scabies.
13. Pediculosis.
14. Herpes simplex.
15. Herpes zoster.
16. Viral warts.
17. Molluscum contagiosum.

- 18.Dermatoses due to external factors (mechanical, thermal, sun exposure).
- 19.Erythema multiforme. Erythema nodosum.
- 20.Psoriasis vulgaris.
- 21.Pityriasis rosea.
- 22.Lichen planus.
- 23.Pemphigus vulgaris.
- 24.Bullous pemphigoid. Dermatitis herpetiformis.
- 25.Urticaria (hives). Angioedema.
- 26.Insect bite. Papular urticaria.
- 27.Dermatitis contacta. Eczema contactum.
- 28.Atopic dermatitis. Atopic eczema.
- 29.Seborrhoeic dermatitis. Seborrhoeic eczema.
- 30.Drug eruptions. Anaphylactic shock. Urticaria and angioedema. Medicamentous dermatitis.
- 31.Drug eruptions. Toxic epidermal necrolysis (Lyell's syndrome). Stevens-Johnson syndrome.
Fixed drug eruptions.
- 32.Lupus erythematosus.
- 33.Dermatomyositis.
- 34.Systemic sclerosis. Localized scleroderma.
- 35.Disorders with increased and decreased pigmentation. Albinism. Vitiligo. Melasma.
- 36.Benign tumours of the skin.
- 37.Premalignant tumours of the skin.
- 38.Basal cell carcinoma.
- 39.Squamous cell carcinoma.
- 40.Malignant melanoma.
- 41.Kaposi's sarcoma.
- 42.Hair diseases.
- 43.Nail diseases.
- 44.Sebaceous glands diseases. Seborrhoea. Acne. Rosacea.
- 45.Diseases of the lips - cheilitis.
- 46.Diseases of the tongue – glossitis.
- 47.Diseases of the mouth and gums - gingivostomatitis.
- 48.Aphthosis. (Bechcet's disease)

SEXUALLY TRANSMITTED INFECTIONS

1. Syphilis – etiology, pathogenesis, and general disease course.
2. Primary syphilis.
3. Secondary syphilis.
4. Tertiary syphilis.
5. Neurosyphilis.
6. Congenital syphilis.
7. Laboratory tests for syphilis. Treatment for syphilis.
8. Gonococcal infection in men. Complications. Treatment.
9. Gonococcal infections in women. Complications. Treatment.
- 10.Pediatric gonorrhoea. Extragenital and disseminated gonorrhoea.

11. Non gonococcal urethritis. Complications. Treatment.
12. Balanitis and balanoposthitis.
13. Vulvitis and vulvovaginitis.
14. AIDS (skin and mucosal manifestations).
